PERSONAL PROFILE

As a software developer I work for various IT companies, universities and non-profit organisations. I have maintained many complex applications in PHP, python, C++ and Uniface. I work as a web developer with drupal

I work efficiently, learn new technical tools quickly, communicate clearly and make clear agreements. As a developer, I work on analysis, coordinating functionality with customers, building and testing the software, fixing bugs and documentation. I often work in teams and on a project basis.

Working Experience

Software/ web developer, Groningen, 2020-2024
- **Drupal, wordpress, Magento 2 a**nd **Joomla** (CMS in **PHP**) I use to maintain websites, commercial webshop and personal projects
- Both alone and in a team of technical specialists I fix bugs and develop new functionality and layout
- I use SEO/Google Ads data to increase conversions

Digital nomad 2014-2019
- I am living in Leipzig in 2019, where I am learning data science technology, including IPython /Jupyter, to analyse open access data with statistics and present the results attractively
- I am staying in the Balkans, Morocco/Spain, Cyprus and Baltics

Back-end Developer, Dutch Open Projects, 2016 – 2017
- I build drupal 7/8 websites for municipalities and companies.
- I work in the team software developers with agile methodologies

Software web developer, Meertens, 2015-2016
- I manage the clarin.eu **drupal** website, I perform updates, make backups and fix bugs in the software
- I manage a large number of custom drupal modules and theme
- I join the FLAT project, a collaborative effort between the Meertens instituut and the Max Planck Instituut

C++ software developer, Ab Ovo, 2011-2013
- I work in my team of developers on the logistics application RCS for international rail traffic (notes of lading, translations) of the goods
- I take an internal course of C++

Uniface developer, University Wageningen 2009-2010
- I manage student administration in Uniface 8, JavaScript and XSLT
- I write SQL scripts for Oracle databases
- I customise the web interface using Uniface Server Pages

Python web developer, University Gent, 2009
- Develop and manage website with Plone in python
- Install and configure Zope application server and CMS Plone on a Debian web server
- I work with a large number of add-on modules in Plone
- I join a Plone theming course at the 2009 Plone conference

Drupal web-developer, Cenn, Tbilisi, 2007-2008
- In Georgia, I am designing a drupal website for the non-profit Cenn to promote sustainable tourism in the ski resort of Bakuriani with content in English, Russian and Georgian

Software developer Uniface, Centric, Sogeti, 2001 -2010
- I develop complex applications for large companies with Uniface
- I write **SQL** scripts used in migrations and new functionality

Archaeologist, Leiden 1992 - 2000
- I create digital field drawings on excavations in the Netherlands, Dresden and Beirut using AutoCAD and MapInfo - e.g. Betuweroute
- I draw artefacts, determine bones and research cesspools, burial grounds and settlements

HOBBY'S

I like learning new languages and I love travelling, cycling and mountains. I love discovering culture and nature. In the 1990s, I worked as a (student) archaeologist in the Netherlands, Dresden and Beirut

I volunteer at festivals (like Noorderzon) and for organisations, tackling the global climate crisis. I lived together in a housing group in the heart of Amsterdam for the last 10 years, before moving to Groningen
